

HYDRAULIC HANDSAW

- Type Options
 - 1 Standard Handsaw
 - 2 Flush-Cut Handsaw
 - 3 Combination Handsaw

- Size Options
 - 16" (Cutting Depth 6.0")
 - 21" (Cutting Depth 8.0")
 - 24" (Cutting Depth 9.5")
 - 30" (Cutting Depth 12.0")

Standard Features

- Sturdy all welded aluminum powder coated frame.
- Heavy Duty large dual position front handle for easy control.
- Water shut-off valve and manifold block positioned to avoid any chance of damage.
- Highly efficient hydraulic motor choice for both strong blade speed and torque delivery.
- All saws include standard 3 foot hose whips including flush face quick disconnects.
- Hydraulic handsaw motors used vary based on power pack engine & pump sizes, can be Marzocchi, Bucher, Cassappa.
- Stainless steel blade collar held in place with stainless "retainer washer & screw attached to motors center tapped shaft.
- Our hydraulic control valve will no longer have o-rings or seal leaks, the new valve has a life-time warranty against leaks.
- Leading our industry with our new design improvement to our handsaw is the three bolt replicable Rear Splash Guard, no more welding up the holes and cracks to repair.
